EDUCATION

AGH University of Science and Technology

- BSc studies - geoinformatics 2019 – 2022
- MSc studies - applied geophysics 2019 – 2020
- BSc studies - geophysics 2015 – 2019

JOB EXPERIENCE

APRISIDE SP. Z O.O

- FE Developer (React, Typescript) 3.2023 - present
- Junior BE Developer (PHP, Yii2) 12.2022 – 3.2023

Worked on developing and enhancing multiple company projects from the frontend side. Key products I contributed to include the OilfieldOS platform (oilfieldos.com) - supporting workflow and process management on oil drilling rigs - and SafeUni (safeuni.pl), a safety and crisis-communication management system.

My responsibilities included:

- Developing new features and maintaining existing parts of the application
- Closely collaborating with backend developers and product teams to deliver scalable, user-friendly solutions
- Conducting code reviews for team members to ensure code quality and consistency
- Managing and maintaining the code repository
- Contributing to the development and maintenance of company portfolio websites built with Angular - not my primary specialty, but I quickly adapted and became effective in the tech stack

IDEO SP. Z O.O

Monthly internship. Creating web applications using PHP and Laravel framework (10.2022)

INTERESTS

- climbing, outdoor and mountain sports, swimming
